# CITY OF GREATER SUDBURY

## LOCATION

- Central Access to North American markets
- Hub for Northeastern Ontario

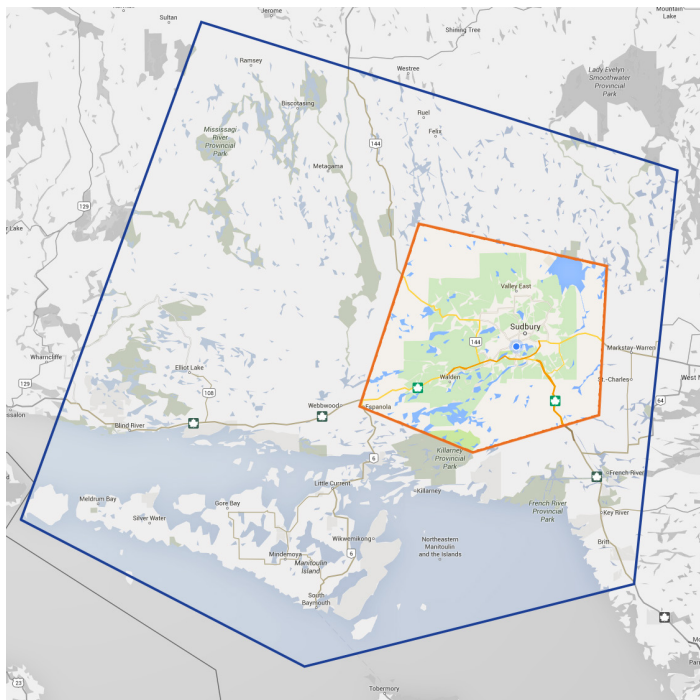

## LEADING INDUSTRIES

- Mining & Construction
- Health Services
- Retail
- Government Services
- Education, Research & Training
- Film

## CATCHMENT AREAS

— Primary Catchment — Secondary Catchment

Catchment areas were selected to provide full and representative coverage of the core and potential markets for the Greater Sudbury Airport and to provide a benchmark for its competitiveness versus the other airports in the region.

### Primary Catchment Area

- The area immediately surrounding city center Sudbury, extending northeast to YSB, approximately one hour drive southwest to Espanola, and roughly 45 minute drive to the southeast and northwest. Within the catchment area, Greater Sudbury Airport would be the first choice for air travel assuming service and fares are comparable.

### Demographics

Population (2016): 164,689

Median Household Income (2016): \$71,687

### Secondary Catchment Area

- The area extends east approximately equidistant from Sudbury and North Bay, and west approximately equidistant from Sudbury and Sault Ste. Marie. The majority of the population in this area lies near Elliot Lake. The secondary catchment represents the region where there is comparable access to alternative airports. This is an area where YSB can compete with other airports assuming Sudbury can demonstrate price and service advantage.

### Demographics

Population (2016): 34,148

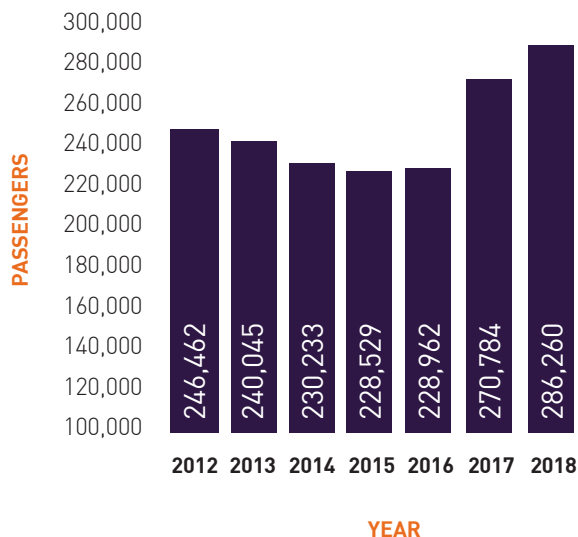

Median Household Income (2016): \$55,601

# GREATER SUDBURY AIRPORT
